PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in full-stack development, backend services, databases, and infrastructure. Experienced in building and integrating web applications, REST APIs, database-driven systems, automation, and cloud infrastructure using JavaScript, TypeScript, React, Node.js, PostgreSQL, Linux, Docker, Nginx, PM2, and GCP.

I enjoy working across different layers of a system, from frontend and backend development to databases, servers, deployment, and infrastructure. I'm particularly interested in understanding how different components work together to build reliable and maintainable software systems.

TECHNICAL SKILLS

Languages	JavaScript, SQL, Python, Bash, Java, C, Go, PHP, C++
Infrastructure	Linux, Docker, Nginx, PM2, GCP, Podman
Automation & Intergration	Google APIs, Webhooks, Third-party API Integration, n8n
Framework	React, Next.js, Vue.js, Express.js, Flask, FastAPI, Laravel, React Native, Tailwind CSS
Databases	PostgreSQL, Mongo DB, MySQL, Maria DB
DevOps & Tools	Git, vim, VS Code, Github
Communication	English (fluent), Indonesian (native)

PROFESSIONAL EXPERIENCE

Web Developer (Intern) | Terra Drone Indonesia — Bandung, Indonesia

Jun 2026 – Present

Database Server (Intern) | Terra Drone Indonesia — Bandung, Indonesia

Jun 2025 – Jun 2026

PROJECTS

TerraMAN WhatsApp Bot | Terra Drone Indonesia —

2026

- TerraMAN.Whatsapp is an automated backup bot that archives messages and media shared in WhatsApp groups, including text, files, images, and videos. Once added to a group, the bot automatically backs up shared content to Google Drive and organizes it into folders based on the corresponding group name.

TerraMAN Finance Telegram Bot | Terra Drone Indonesia —

2026

- TerraMAN Finance is a Telegram-based financial tracking bot that uses LLM and OCR to record AED transactions into Google Sheets and maintain user-specific financial records.

Terra Academy | Terra Drone Indonesia —

2026

- Terra-Academy is a Learning Management System for managing drone training, courses, learning materials, user progress, and certifications.

Product Resseling hub | Terra Drone Indonesia —

2026

- Product Reselling Hub is an enterprise sales platform for managing inventory, sales, logistics, after-sales service, and revenue tracking.

Terra Hub | Terra Drone Indonesia —

2026

- Terra Hub is a centralized organization portal that provides access to multiple web products and internal applications through a single platform.

Terra Progress | Terra Drone Indonesia —

2025

- Terra Progress is a geospatial platform for monitoring project progress through interactive maps and visual documentation.

Terra Organize | Terra Drone Indonesia —

2025-2026

- Terra-Organize is a centralized drone fleet management system for managing pilots, inventory, maintenance, operations, and flight logs.

SkyOps Mobile & Web | Terra Drone Indonesia —

2025

- SkyOps is a digital inventory tracking system for managing items moving in and out of inventory and project sites. It provides mobile and web applications for digitally checking and tracking equipment, ensuring that all items being transported are properly recorded and accounted for.

EDUCATION

School Of Computer Science – Database Technology | Binus University — Bandung, Jakarta Indonesia

September 2022 – Present

CERTIFICATIONS & TRAINING

- SQL and Relational Databases [cognitive class(2026)]
- Data Analysis With Python [cognitive class(2026)]
- Drone Pilot Training Certificate [Terra Drone Indonesia (2025)]
